24mm Palæsprosse

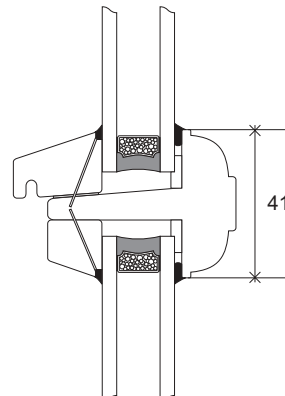

Palæsrossen er en af vore stoltheder

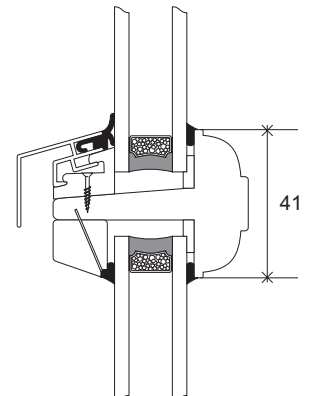

Den kan anvendes hvor der oprindeligt var sprosser og kittede ruder og accepteres som regel også i bevaringsværdige eller fredede bygninger. Trods det gennemgående glas ser sprossen ud som en glassdelende sprosse, da der monteres en alu-profil indvendigt i termoruden.

41mm Glasdelene sprosse

Rigtige løsninger i træ

DanStyle er leveringsdygtige i stort set alt indenfor træelementer lige fra små vinduer til store vindues- og dørpartier samt specielle elementer.

Træ er ikke bare træ - derfor kan vi hos DanStyle tilbyde døre og vinduer i mange forskellige træsorter. Lærk er en træsort der er ved at være meget populær, da den har selvimprægnerende egenskaber, ser godt ud og er meget holdbar, men også mahogni er ikke længere et sjældent syn i både nye og gamle huse.

Træprogrammet leveres i **fyr, lærk, mahogni** og **eg**.

Alle løsninger udføres som regel med energibesparende isoleringsruder og fremstilles i de materialer og mål byggeprojektet og/eller arkitekten foreskriver.

Denne oversigt er tænkt som inspirationskilde, idet vort motto er: "Hvad der kan tegnes på papir, kan som regel også omsættes til virkelighed".

Ingen tillæg for specialmål.
